DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the panels being capable of being folded in parallel relation to one another inside of a pickup truck tailgate must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3612

4. Claims 8-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The applicant, in claims 8, 10, and 16, claims the "panels are capable of being folded in parallel relation to one another inside of a pickup truck tailgate". It is unclear how this is possible with the hinge arrangement shown between the panels in the drawings. It appears the hinges would interfere with the panels when attempting to fold the panels in a parallel arrangement.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1, 2, and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Parry-Jones et al.

Re claim 1, Parry-Jones et al. discloses a folding tailgate extension comprising a plurality of rectangular panels (22, 24), wherein the longitudinal edges of the panels are hingedly (by 26) attached to each other in series.

Re claim 2, the panels further comprise locking means (column 2, lines 31-32).

Application/Control Number: 10/621,204

Art Unit: 3612

Re claim 7, the series of panels has at least a first and a last end panel, the first end panel is hingedly attached to a pickup truck tailgate by a mounting bracket and fasteners (piano hinge 28 which inherently requires fasteners for attachment), and the last end panel has a free end.

Re claim 8, the panels are capable of being folded in parallel relation to one another inside of a pickup truck tailgate (see figure 1).

Re claim 9, the panels, when folded, have substantially the same height as a pickup truck tailgate (see figure 1).

Re claim 10, Parry-Jones et al. discloses a folding tailgate extension comprising a plurality of rectangular panels (22, 24), wherein the longitudinal edges of the panels are hingedly (by 26) attached to each other in series, the series of panels has at least a first and a last end panel, the first end panel is hingedly attached to a pickup truck tailgate by a mounting bracket and fasteners (piano hinge 28 which inherently requires fasteners for attachment), the last end panel has a free end, the panels are capable of being folded in parallel relation to one another inside of a pickup truck tailgate, and the panels, when folded have substantially the same height as a pickup truck tailgate (see figure 1).

Re claim 11, the panels further comprise locking means (column 2, lines 31-32).

Allowable Subject Matter

7. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3612

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Young, Sr., Prator, Norton, Curtis et al., Collins, Wilson, Henderson, and Reed disclose tailgate attachments.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason S. Morrow whose telephone number is (703) 305-7803. The examiner can normally be reached on Monday-Friday, 8:00a.m.-4:30p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on (703) 308-3102. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
